

Articulate 360:  
**AI Assistant**

# About OL

At Omniplex Learning, we are committed to empowering organisations to achieve the best possible outcomes from their learning and development initiatives. Our comprehensive solutions—including authoring tools, LMS solutions, digital adoption, content creation, training, and professional services—are designed to provide continuous support at every stage of the L&D journey.

We proudly partner with global leaders, Articulate, CYPHER Learning, Docebo, and Vyond, reinforcing our status as a trusted ally in the industry. Drawing on our extensive expertise and knowledge, we bring unparalleled insights and innovative solutions to our clients. Our deep understanding of the industry allows us to tailor our services to meet the unique needs of each organisation, ensuring they have the tools and support necessary to succeed

# Course overview

Designed and delivered by our experts, this one-day course combines short demonstrations with hands-on activities to help participants build confidence using the AI Assistant in Storyline and Rise.

The format focuses on practical application, giving designers the space to experiment, build quickly, and understand where AI fits into their workflow without replacing instructional design expertise.

Throughout the day, participants will learn how to use AI to accelerate scenario drafting in Storyline and create interactive content in Rise, including custom code block interactions.

By the end of the course, participants will understand where AI adds value, when to rely on their own expertise, and how to use simple prompt patterns to support their day-to-day work.

## Core objectives

# 01

Create a short Storyline scenario using AI Assistant to generate dialogue, choices and consequences.

# 02

Build responsive interactions in Rise using AI-generated code blocks and structured prompts.

# 03

Apply prompt patterns to generate content, refine outputs and support course development.

## Course details

### Audience:

Articulate 360 users looking to use AI more effectively in their workflow.

### Course dates:

Check our website for the latest dates.

### Format and delivery:

Delivered by expert instructors, either virtually or in person.

# Agenda

01

## Using AI as a Design Partner

Understand how AI supports learning design and decisions while keeping designers in control.

- Analyse where AI adds value across the design workflow
- Evaluate common barriers and opportunities in AI-supported L&D
- Apply instructional design thinking when working with AI

02

## Structuring Prompts for Learning Workflows

Develop prompts that translate learning intent into clear, usable AI outputs.

- Translate learning objectives into structured prompts
- Create reusable prompt patterns for consistent outputs
- Refine outputs through simple, structured iteration

03

## Storyline AI Assistant

Use AI Assistant in Storyline to generate content and accelerate early drafting.

- Create on-screen text and scenarios using structured prompts
- Refine scenario choices to support clear learning outcomes
- Apply prompts to support accessible, well-structured interactions

04

## Building Interactions in Rise

Use AI and code blocks to build responsive, interactive component in Rise.

- Interpret AI-generated HTML, CSS and JavaScript for use in Rise
- Embed custom HTML code to create tailored interactions
- Build responsive, learner-driven interactions using AI-supported code

05

## Reviewing & Refining

Apply structured review approaches to improve quality and consistency when using AI.

- Guide AI outputs using prompts that support accessibility needs
- Test interactions for mobile responsiveness and usability
- Evaluate content against instructional design and accessibility standards

# Pre-requisites and assessment

The training is suitable for a range of skill levels. Participants should have basic computer skills and be familiar with common user interfaces, such as PowerPoint.

This is a hands-on course, so participants will need access to the latest version of Articulate Storyline on their PC or Mac (Mac users will require a Windows interface, such as Parallels), or access to the Articulate 360 free trial.

## All attendees will need:

- The latest version of Storyline installed and ready to use
- For virtual training, we recommend two screens for an optimum learning experience

“Saffy was absolutely fantastic. The session was ran so professionally, with lots of patience and allowed time to practice. She was able to accommodate our different needs (timing, pace etc.) The course also provided many resources to aid us in building accessible courses using the Articulate tools, and other best practices.”

**SENIOR TRAINING AND EDUCATION MANAGER,  
VISIT BRITAIN/ VISIT ENGLAND**

“Brilliant training, very engaging and useful with a good mix of instruction and activity. The training was well-presented and I liked that discussion was encouraged – it was really good that Saffy encouraged and allowed time for this.

Thank you very much for enjoyable and valuable sessions, thank you!”

**JOANNA WALDRON**  
**SENIOR LEARNING DESIGNER, SODEXO**

### Articulate Storyline 360

The award-winning Storyline 360 app makes digital learning content creation easy. The possibilities are endless with Storyline. Build immersive and memorable learning experiences with fantastic features like slide layers, triggers and motion paths to create professional and impressive content that engages your learners.

## articulāte 360

### Articulate Rise 360

This training course will provide eLearning developers, instructional designers and subject matter experts with the knowledge and skillset to design, build and distribute their own rapid eLearning programmes using the Articulate 360 software.

## articulāte 360

### Articulate Rise 360 + Storyline

On this practical and hands-on two-day course, our expert trainers will give all the industry tips you need to get more creative with your content. You will learn how to maximise the advanced features of Storyline, in the smartest way possible from gamification to bespoke navigation.

## Diploma in Instructional Design

An ITOL accredited diploma to master the art of creating memorable learning experiences. Unpack evidence based learning theories, proven frameworks and powerful tools to transform your digital learning content. It's the perfect opportunity to level up your skills and earn an industry-recognised diploma.

## Diploma in Visual Design

Effective visual design can help you clearly communicate ideas, guide learners through material and accelerate knowledge retention. These visuals can be the difference between gaining their full attention or losing their focus instantly. Master effective design principles and equip yourself with proven methods for creating professional and impactful visuals in a range of formats from eBooks to PowerPoints.
